## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method for assaying potency and stability of a virus comprising contacting cells with virus and measuring caspase 3 activity.

Group II, claim(s) 9-17, drawn to a method of identifying a stabilizing formulation comprising the steps of infecting plurality of cells with a virus with different formulations and measuring caspase 3 activity produced from said virus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The corresponding special technical features, Caspase 3, of both Groups do not contribute over the art, thereby breaking the unity of invention. (See attached document, retrieved from [www.assaydesigns.com](http://www.assaydesigns.com).)

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
